Consider It Solved

Welcome to Beacyn

Your Smart, Simple, and Scalable Time & Attendance Solution

Managing time and attendance shouldn't be a burden. At Beacyn, we've reimagined how businesses, schools, and event organizers track presence—making it effortless, accurate, and accessible. Whether you're managing employees, students, or event attendees, Beacyn offers the flexibility and tools you need—all in one intuitive platform.

TIME CLOCK
Track On-Site and Remote Employee Time

Beacyn's Time Clock feature allows businesses to accurately log employee work hours whether they're on-site or working remotely. It eliminates manual errors, reduces time fraud, and ensures labor compliance with real-time updates and reports.

Use Cases:

• Offices with hybrid or remote workforces

• Construction companies tracking job site hours

• Healthcare facilities logging shift start/end times

• Retail stores with multiple staff across shifts

PATH TRACKER
Track Field Staff Movement

Path Tracker provides real-time tracking of employees as they move between locations throughout the workday. It records location transitions and time spent at each site, giving managers full visibility of mobile teams.

Use Cases:

- Service technicians visiting multiple clients
- Delivery teams covering broad areas
- Security staff patrolling different checkpoints
- Sales reps making multiple on-site visits

CLASS TRACK
Student and Instructor Attendance

Class Track simplifies attendance tracking in educational environments. Teachers can mark attendance quickly, and students can check in easily. The system supports instructor time logs as well, generating reliable records for audits and compliance.

Use Cases:

• Schools tracking daily classroom attendance
• Colleges monitoring attendance for each lecture
• Training centers logging both students and trainers
• Online/hybrid learning setups verifying participation

CHECK MARK
One-Tap Check-Ins for Events & Seminars

Check Mark enables instant presence logging with just a tap. It's perfect for scenarios where only check-in is required, with no checkout or hour calculation needed. Simple, fast, and efficient for both organizers and attendees.

Use Cases:

• Corporate seminars or workshops

• Guest lectures at universities

• Conferences with multiple sessions

• Volunteer sign-ins at community events
